PROFILE SUMMARY

Electronics and Communication Engineering graduate transitioning into Software Development with practical experience in React.js, JavaScript, HTML, CSS, Tailwind CSS, Git, and GitHub. Passionate about frontend development, responsive UI design, and building modern web applications. Eager to contribute technical skills and problem-solving abilities in a Frontend Developer role.

TECHNICAL SKILLS

- **Programming Languages:** JavaScript (ES6+)
- **Front-end Technologies:** React.js, HTML5, CSS3, JavaScript (ES6+), Bootstrap, Tailwind CSS,
- **React Ecosystem:** React Router, React Hooks, Context API, Redux Toolkit
- **APIs & Backend Integration**: Axios, Context Api
- **Build &Dev Tools**: npm , Vite
- **Version control:** Git, GitHub

PROJECTS

Title 1: React Mock Interview Platform

Tech Stack: React.js, JavaScript, Tailwind CSS.

Description:

- Developed a responsive React-based mock interview platform for practicing frontend interview questions.
- Implemented concept-wise assessments covering React Basics, Hooks, Props, Router, Context API, Redux, and Performance Optimization.
- Built dynamic score calculation, answer review, test history tracking, and dashboard analytics using React state management and Local Storage.
- Designed reusable components and responsive user interfaces using Tailwind CSS.
- Integrated Git and GitHub for version control and project management.

GitHub Repository:

github.com/kollamadhan23/react-mock-interview-app

Title 2: Personal Portfolio Website

Tech Stack: React.js, JavaScript, Tailwind CSS, Vercel

Description:

- Developed a responsive personal portfolio website using React.js and Tailwind CSS.
- Designed reusable React components for a clean and modern user interface.
- Showcased projects, technical skills, education, and contact information.
- Implemented responsive design for seamless viewing across desktop and mobile devices.
- Deployed the application on Vercel and managed source code using Git and GitHub.

Title 3: Portable Embedded System for Measuring the Quality and Quantity of Petrol

Hardware Used: Micro Controller, Ultrasonic sensor, Ph sensor, Breadboard, Connecting Wires
Software Used: Arduino Uno
Description:

An Embedded system that detects the quality and quantity of fuel by Sensing method. Mar 2024. Ultrasonic sensor detects the quantity of petrol remaining in the fuel tank. Based on pH value, octane number, sulfur content, water content, and sediment content of the fuel Quality can be determined.

EDUCATION

Bachelor of Engineering

Electronics and Communication Engineering
Sathyabama Institute of Science and Technology, Chennai — CGPA: 8.67
Sep2020 – May 2024

12th Grade (Intermediate)

Narayana Junior College, Nellore
July 2018 – April 2020 — CGPA:9.34

10th Grade

Vikas High School — CGPA:8.3
July 2017 – April 2018

CERTIFICATIONS

• NPTEL - Introduction to IoT
